

## Forwarding The Sino-Japanese Comprise Solution Statements on the Realization of "Schumann Declaration" Asian Edition

**LIU Shu-han**

**President, Tianjin University of Commerce, China**

After the World War Two and it was on May 9<sup>th</sup>, 1950, the foreign minister Mr. R.Schumann published his famous "Schumann Declaration" proposing a community which is over-heading the countries and signed the "European Coal and Steel Community Treaty" which had been regarded as the first step for EU.

France and Germany, the bitter enemy before the War, what they had concerned was the common benefits of all other countries, had suffered a lot and tried and contributed whatever they could for the set up of EU.

Presently, East Asian Community is undergoing. Compared with the EU, the East Asian Community is facing numbers of problems, such as the differences of their history, economy, politics and cultures etc.

As the two important economic countries, both China and Japan have playing a very important role in the process of East Asian Community. Even though there still have problems between the two countries as the historical disputes, petroleum argument in East Ocean and the Theory of Chinese Threaten.

In order to solve all the problems and reach the comprise solution of them all, this article has showed us the views as;

### A. Forecasting Judgment

We may see clearly from the diplomatic relations set up between China and Japan, funds and technology from Japan and the rich human resources and the big market that China have provided. All these resources have worked and will last for a long period of time for the complementary trade between the two countries. China is not the thread to Japan. Caring for the economic cooperation will bring the two countries benefits. It is very important to have the right sensation of China's economic growth and keep the partnership of their trading.

### B. Promote the mutual understanding and dealing with the historical problems

### C. Push forward the joint benefits among east Asian countries

In terms of petroleum in East Ocean, the proposition is "Use it Peacefully and Explore it jointly"  
In terms of East Asian Community, the proposition is "To undertake it actively" and start the FTA among China, Japan and Korea. This is the keen step for East Asian Community.

In one word, to deal properly with the problems and push forward the mutual benefits will be the right way for both China and Japan, and it would influence the set up of the East Asian Community. The two countries will take common benefits from all other Asian countries of their own. If they have played the part as France and Germany had done. If so, we will see the realization of Asian edition "Schumann Declaration" in the near future.
